Education

University of New Brunswick — Fredericton, NB
Bachelor of Science in Electrical Engineering, 4.1/4.3 GPA — *Sept. 2023 – May 2028*

Experience

Electrical Reliability Co-Op — May 2026 – Aug. 2026
Michelin North America — *Granton, NS*

- Scoped a capital project, creating electrical drawings and bid documents that drew quotes exceeding $70,000.
- Coordinated installation of 6 projects with contractors, production, and maintenance, delivering on-time through proactive scheduling and communication.
- Updated and created new electrical designs, improving cost-effectiveness and maintainability through consultation with maintenance and senior engineers.

Residence Assistant — Aug. 2024 – May 2026
University of New Brunswick — *Fredericton, NB*

- Ensured resident safety and upheld community standards by completing hourly rounds and building rapport with 90+ residents.
- Organized and delivered 6 events, 4 of which had over 50% resident participation, by ensuring accessibility and attendance incentives.

Summer Student – Membrane Curer/Tire Builder — May – Aug. (2024, 2025)
Michelin North America — *Granton, NS*

- Efficiently built tire interiors and curing membranes using heavy-duty equipment, meeting production targets by communicating supply/machine issues to co-workers.
- Mitigated machine issues and stabilized group production by creating a problem-solving framework by obtaining knowledge from senior operators and maintenance.
- Ensured product quality, achieving a 1.15% membrane scrap rate by following work methods and consistently inspecting work for defects at all stages.

Projects

SCORBOT-ER V+ Controller | *Arduino, Visual Studio, C#, C++, .NET* — Feb. 2026 – May 2026

- Researched motor controllers such as the LM628, evaluated potential solutions, wrote technical documentation
- Co-developed a PID controller for a SCORBOT-ER Vplus using an Elegoo MEGA 2560.
- Created customer and engineering requirements based on correspondence with professor.
- Built an app that used UART to send and receive data to/from the controller.

Shutdown Circuit | *Altium Designer, DigiKey, PCB* — Dec. 2025 – Aug. 2026

- Developed a key safety system for a Formula SAE EV that controls the isolation relays of the high-voltage battery.
- Chose appropriate relays, MOSFETs, and ICs to create a design that complied with the FSAE rules.
- Designed a hardware latching mechanism using a logic inverter and an S-R latch to interface with N.O. relays.
- Presented design to local media (CBC) in a TV interview.

Leadership

UNB Formula Racing | Low Voltage Subteam — Oct. 2025 – Present

- Coordinated with design team to design essential safety circuits and write technical documentation.
- Provided mentoring for less experienced team members to ensuring longevity of team.

Hill Debate Society | V.P. Finance, Equity Officer — Sept. 2023 – Present

- Participated in and judged structured discussions of many topics.
- Helped plan and host tournaments, delivering briefings and ensuring an equitable environment.

Skills

Languages: C/C++, Python, C#, MATLAB, Assembly, VHDL, RSLogix, HTML/CSS
ECE Software: Altium Designer, LTspice, Quartus Prime, SEE Electrical, MPLAB, Siemens Teamcenter (PLM)
Other Tools: AutoCAD, DraftSight, Fusion 360, Microsoft Office Suite, Visual Studio, Git, LaTeX, Linux
